JOB OPPORTUNITY

Kamal Pharmachem Inc. (www.kamalpharmachem.com) is a chemistry technology company that develops innovative catalysts and processes for the manufacture of pharmaceutical products, including active pharmaceutical ingredients, intermediates and precursors. Our technologies, products and services are designed to enable safe, environmentally responsible, cost-effective and sustainable solutions for pharmaceutical production.

Kamal Pharmachem Inc. has immediate openings for **two (2) Ph.D. synthetic organic chemists with experience in organometallic chemistry and catalysis**. The candidates will be highly motivated and independent researchers with hands-on experience in the synthesis and handling of organic and organometallic compounds, including air-stable, air-sensitive and moisture-sensitive materials. Prior experience in an industrial setting is advantageous. Duties will also include the preparation of research proposals for clients with specified milestones, schedules and deliverables.

The position will involve the routine use of process reactors, inert atmosphere glove boxes, Schlenk techniques and high pressure reactors. Experience in the setting up and use of modern laboratory instruments (NMR, GC, HPLC, polarimeters, IR/UV/Vis spectrophotometers) is required. The possession of good project management skills, the ability to work independently and collaboratively, good publication record and excellent verbal communication and presentation skills are essential.

Kamal Pharmachem Inc. offers an attractive salary and benefits package. Salary will be commensurate with qualifications and experience. Applications including a cover letter and a resume outlining education, employment history, research experiences, publications, patents and the names of three (3) referees should be sent by email to chemistry@kamalpharmchem.com.

All applications must be received by March 25, 2015.
